### INDEPENDENT AUDITORS' REPORT

To the Members of JN LIFE INSURANCE COMPANY LIMITED

### Report on the financial statements

We have audited the financial statements of JN Life Insurance Company Limited ("the company"), set out on pages 3 to 32, which comprise the statement of financial position as at December 31, 2013, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards and the Jamaican Companies Act, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether or not the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence relating to the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including our assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### INDEPENDENT AUDITORS' REPORT (CONTINUED)

To the Members of JN LIFE INSURANCE COMPANY LIMITED

### Report on the Financial Statements, continued

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of the company as at December 31, 2013, and of its financial performance, changes in equity and cash flows for the year then ended, in accordance with International Financial Reporting Standards and the Jamaican Companies Act.

### Report on additional matters as required by the Jamaican Companies Act

We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit. In our opinion, proper accounting records have been maintained, so far as appears from our examination of those records, and the financial statements, which are in agreement therewith, give the information required by the Jamaican Companies Act, in the manner required.

Notes to the Financial Statements December 31, 2013

### 1. The company

The company is incorporated in Jamaica and is a wholly-owned subsidiary of The Jamaica National Building Society, which is also incorporated in Jamaica, under the Building Societies Act. The company is domiciled in Jamaica and its registered office is located at 2-4 Constant Spring Road, Kingston 10.

In 2011, the company obtained a licence from the Financial Services Commission (FSC) to conduct ordinary life insurance business. In December 2012, the company received approval from the FSC to market Group Mortgage Blanket Protection Policy (Bulk Premium). It commenced underwriting life insurance in July 2013. Subsequent to the year end, the company received approval from the FSC to market Single Premium product.

### 2. Statement of compliance and basis of preparation

### (a) Statement of compliance:

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and comply with the provisions of the Jamaican Companies Act.

### New, revised and amended standards and interpretations effective during the year

Certain new, revised and amended standards and interpretations came into effect during the current financial year. The company has adopted the following new standards and amendments to standards, including any consequential amendments to other standards, applicable to its operations, with a date of initial application of January 1, 2013. The nature and effects of the changes are as follows:

### (i) IFRS 13 Fair Value Measurement

IFRS 13 establishes a single framework for measuring fair value and making disclosures about fair value measurements when such measurements are required or permitted by other IFRSs. It unifies the definition of fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It replaces and expands the disclosure requirements about fair value measurements in other IFRSs, including IFRS 7. Consequently, the company has included additional disclosures in this regard (see note 21).

The change had no significant impact on the measurements of the company's assets and liabilities.

### (ii) Presentation of Items of Other Comprehensive Income (Amendments to IAS 1)

As a result of the amendments to IAS 1, items of other comprehensive income (OCI) that may be reclassified to profit or loss in the future are presented separately from those that would never be reclassified to profit or loss. Also, the title of the statement has changed from Statement of Comprehensive Income to Statement of Profit or Loss and Other Comprehensive Income.

Notes to the Financial Statements (Continued) December 31, 2013

### 2. Statement of compliance and basis of preparation (continued)

### (b) Basis of preparation:

The financial statements are prepared under the historical cost convention, modified for the inclusion of available-for-sale investments at fair value, except for those for which a reliable measure of fair value is not available.

### (c) Functional and presentation currency:

The financial statements are presented in Jamaica dollars, which is the company's functional currency.

### (d) Use of estimates and judgement:

The preparation of the financial statements in conformity with IFRS requires management to make estimates, assumptions and judgements that affect the application of accounting policies and the reported amounts of, and disclosures relating to, assets, liabilities, contingent assets and contingent liabilities at the reporting date and the income and expenses for the year then ended. Although these estimates are based on management's best knowledge of current events and actions, actual amounts could differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in note 4.

### (e) Comparative information

Whenever necessary, the comparative figures are restated to conform to current year's presentation.

### 3. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

### (a) Accounts payable:

Accounts payable are stated at amortised cost.

### (b) Accounts receivable:

Trade and other accounts receivable are stated at amortised cost less impairment losses [see note 3(n)].

Notes to the Financial Statements (Continued) December 31, 2013

### 3. Significant accounting policies (continued)

### (c) Cash and cash equivalents:

Cash and cash equivalents are shown at cost. They comprise bank balances and short-term, highly liquid investments where original maturities do not exceed three months, are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term commitments.

### (d) Securities purchased under resale agreements:

Securities purchased under resale agreements ("reverse repos" or "resale agreements") are short-term contracts under which securities are bought with simultaneous agreements to resell them on a specified date and at a specified price. Reverse repos are accounted for as short-term collateralised lending and are carried at amortised cost, less impairments.

The difference between the purchase and resale considerations is recognised on the accrual basis over the period of the agreements, using the effective yield method, and is included, in interest income.

### (e) Foreign currency transactions and balances:

Transactions in foreign currencies are translated to the functional currency of the company at the exchange rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the foreign exchange rates ruling at that date.

The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortised cost in foreign currency translated at the exchange rate at the end of the year. Non-monetary assets and liabilities that are denominated in foreign currencies and are carried at fair value are translated to the functional currency at the foreign exchange rates ruling at the dates that the fair values were determined. Foreign currency differences arising on translation are recognised in profit or loss.

### (f) Taxation:

### (i) Income tax

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognised in profit or loss, except to the extent that it relates to items recognised directly in other comprehensive income, in which case it is recognised in other comprehensive income.

Current income tax is the expected tax payable on the income for the year, using tax rates substantively enacted at the financial year end, and any adjustment to tax payable in respect of previous years.

Notes to the Financial Statements (Continued) December 31, 2013

### 3. Significant accounting policies (continued)

### (f) Taxation (continued):

### (ii) Deferred tax

Deferred income tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on laws that have been enacted by the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences only to the extent that it is probable that future taxable profits will be available against which the asset can be realised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

### (iii) Premium tax

Tax on premium income earned is included as an operating expense as it is considered a tax on revenue rather than on profits.

### (g) Property, plant and equipment:

Items of property, plant and equipment are stated at cost, less accumulated depreciation and impairment losses [see note 3(n)]. Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the company and its cost can be reliably measured. The cost of day to day servicing of property, plant and equipment is recognised in the statement of profit or loss and other comprehensive income as incurred.

Property, plant and equipment, with the exception of artwork, on which no depreciation is provided, are depreciated on the straight-line basis at annual rates to write down the assets to their estimated residual values over their expected useful lives.

The depreciation rates are as follows:

Leasehold improvements 331/3%
Office equipment 10%
Furniture and fittings 10%

The depreciation methods, useful lives and residual values are reassessed at each reporting date.

Notes to the Financial Statements (Continued) December 31, 2013

### 3. Significant accounting policies (continued)

### (h) Insurance contracts:

Insurance contracts are accounted for in compliance with the recommendations and practices of the insurance industry, and comply with the provisions of the Insurance Act 2001.

### (i) Classification

The company issues contracts that transfer insurance risk which are short-term life insurance contracts.

Insurance contracts are those contracts that transfer significant insurance risk. Such contracts may also transfer financial risk. The company defines insurance risk as significant if an insured event could cause an insurer to pay significant additional benefits in a scenario that has a discernible effect on the economics of the transactions.

### (ii) Recognition and measurement

The insurance contracts insure human life for death or permanent disability over a short duration. Short-duration life insurance contracts protect the company's customer from the consequence of events such as death or disability that would affect the ability of the customer or his/her dependents to maintain their current level of income. Guaranteed benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the policy-holder. There are no maturity or surrender benefits.

The underwriting results are determined after making provision for, inter alia, outstanding claims. Outstanding claims comprise estimates of the amount of reported losses and loss expenses, plus a provision for losses incurred but not reported based on the historical experience of the company. The loss and loss expense reserves have been reviewed by the company's actuary using the past loss experience of the company and industry data.

Amounts recoverable in respect of claims from reinsurers are estimated in a manner consistent with the underlying liabilities. Management believes that, based on the analysis completed by the actuary, the provision for outstanding losses and loss expenses will be adequate to cover the ultimate net cost of losses incurred up to the reporting date. However, the provision is necessarily an estimate and may, ultimately, be settled for a significantly greater or lesser amount. Any subsequent differences arising are recorded in the period in which they are determined.

Insurance contract liabilities are determined by an independent actuary using the Policy Premium Method of valuation. These liabilities are, on valuation, adjusted through the statement of profit or loss and other comprehensive income to reflect the valuation determined under the Policy Premium Method.

### (i) Reinsurance contracts:

The company enters into contracts with reinsurers under which it is compensated for losses on contracts it issues and which meet the classification requirements for insurance contracts [see note 3 (h)]. Reinsurance does not relieve the originating insurer of its liability.

Notes to the Financial Statements (Continued)

<u>December 31, 2013</u>

### 3. Significant accounting policies (continued)

### (j) Revenue recognition:

### (i) Premium income

Gross premiums are recognised as revenue when due. When premiums are recognised, the related actuarial liabilities are computed, resulting in benefits and expenses being matched with revenue.

### (ii) Interest income

Interest income is recognised in profit or loss for all interest-earning instruments on the accrual basis using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to the carrying amount of the financial asset. The effective interest rate is established on initial recognition of the financial asset and is not revised subsequently. Interest income includes coupons earned on fixed income investments, accretion of discount on treasury bills and other discounted instruments, and amortisation of premium on instruments bought at a premium.

### (iii) Realised gains and losses

Realised gains and losses recorded in the statement of profit or loss and other comprehensive income relate to gains and losses on the sale of financial and other assets. This is calculated as the difference between net sales proceeds and the current carrying value and is recorded on occurrence of the sale transaction.

### (k) Financial instruments:

A financial instrument is any contract that gives rise to a financial asset of one enterprise and a financial liability or equity instrument of another enterprise. For the purpose of the financial statements, financial assets have been determined to include cash and cash equivalents, securities purchased under resale agreements, investments and accounts receivable. Financial liabilities include policyholders' liabilities, accounts payable and due to parent society.

### (i) Recognition

The company initially recognises securities purchased under resale agreements, certificates of deposit and debt securities on the date that they are originated. All other financial assets and liabilities are initially recognised on the settlement date, at which the company becomes a party to the contractual provisions of the instrument.

### (ii) Derecognition

The company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the company is recognized as a separate asset or liability.

The company derecognises a financial liability when its contractual obligations are discharged, cancelled or expired.

Notes to the Financial Statements (Continued) December 31, 2013

### 3. Significant accounting policies (continued)

### (1) Investment securities:

Management determines the classification of investments at the time of purchase and takes account of the purpose for which the investments were purchased. Investments are classified as loans and receivables, held-to-maturity, at fair value through profit or loss and available-for-sale securities.

### (i) Loans and receivables:

Loans and receivables are non-derivative financial assets that are created or purchased by the company, with fixed or determinable payments and are not quoted in an active market. They arise when the company provides money or services directly to a debtor with no intention of trading the receivable.

Loans and receivables comprise cash and cash equivalents and securities purchased under resale agreements.

### (ii) Held to maturity:

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the company's management has the positive intention and ability to hold to maturity. These investments are initially recognised at cost with transaction costs directly attributable included. After initial measurement, held to maturity financial assets are measured at amortised cost using the effective interest rate method. Were the company to sell other than an insignificant amount of held to maturity investments before maturity, the entire category would be compromised and reclassified as available for sale.

### (iii) Available-for-sale investments:

Available for sale investments are those non-derivative financial assets that are designated as available for sale or are not classified in the above two categories; they are intended to be held for an indefinite period of time, and may be sold in response to needs for liquidity or changes in interest rates or market prices. They are initially recognised at cost, and subsequently remeasured at fair value. Fair value gains and losses are reported as a separate component in the statement of profit or loss and other comprehensive income. On disposal of these investments, the unrealized gains or losses included in other comprehensive income are included in profit or loss. However, interest, which is calculated using the effective interest method, is recognised in profit and loss.

### (iv) Financial liabilities:

Non-derivative financial liabilities are classified as other financial liability. Other financial liabilities comprise policy holder's liabilities, accounts payable and due to parent society.

Notes to the Financial Statements (Continued) December 31, 2013

### 3. Significant accounting policies (continued)

### (m) Employee benefits:

Employee benefits are all forms of consideration given by the company in exchange for services rendered by employees. These include current or short term benefits such as salaries, bonuses, NIS contributions, annual leave, and non-monetary benefits such as medical care; post employment benefits such as pension.

Employee benefits that are earned as a result of past or current service are recognised in the following manner: Short-term employee benefits are recognised as a liability, net of payments made, and charged as an expense. The expected cost of vacation leave that accumulates is recognised when the employee becomes entitled to the leave.

The parent Society provides post-retirement pension benefits to employees who have satisfied certain minimum service requirements. These benefits are accounted for under a defined contribution pension plan and the obligations for contributions are recognised as an expense in the profit or loss as incurred.

### (n) Impairment:

The carrying amounts of the company's assets are reviewed at each reporting date to determine whether there is any indication of impairment. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and the loss event has an impact on the future cash flows of the asset that can be estimated reliably. If any such indication exists, the asset's recoverable amount is estimated at each reporting date. An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in profit or loss.

### (i) Calculation of recoverable amount:

The recoverable amount of the company's receivables is calculated as the present value of expected future cash flows, discounted at the original effective interest rate inherent in the asset. Receivables with a short duration are not discounted.

The recoverable amount of other assets is the greater of their fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value, using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

### (ii) Reversals of impairment:

An impairment loss in respect of a receivable is reversed if the subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised.

In respect of other assets, an impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

An impairment loss is reversed only to the extent that the assets carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Notes to the Financial Statements (Continued) December 31, 2013

### 3. Significant accounting policies (continued)

### (o) Claims:

Claims are recorded in the profit or loss net of reinsurance recoverable. Charges for provision for claims is recognised in profit or loss based on the estimated liability determined by the actuary.

### (p) Related parties:

A related party is a person or entity that is related to the company,

- a) A person or a close member of that person's family is related to the company if that person:
  - (i) has control or joint control over the company;
  - (ii) has significant influence over the company; or
  - (iii) is a member of the key management personnel of the company.
- b) An entity is related to the company if any of the following conditions applies:
  - (i) The entity and the company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
  - (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
  - (iii) Both entities are joint ventures of the same third party.
  - (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
  - (v) The entity is a post-employment benefit plan for the benefit of employees of either the company or an entity related to the company.
  - (vi) The entity is controlled, or jointly controlled by a person identified in (a).
  - (vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

A related party transaction is a transfer of resources, services or obligations between related parties, regardless of whether a price is charged.

(q) New, revised and amended standards and interpretations not yet effective:

A number of new, revised and amended standards and interpretations were in issue but were not yet effective and which the company has not early adopted. The company has assessed the relevance of all such standards and interpretations and has determined that the following are likely to be relevant to its operations:

Notes to the Financial Statements (Continued) December 31, 2013

### 3. Significant accounting policies (continued)

- (q) New, revised and amended standards and interpretations not yet effective (continued):
  - IFRS 9, Financial Instruments (2010) supersedes the previous version of IFRS 9 issued in 2009, and is effective for accounting periods beginning on or after January 1, 2017 (previously January 1, 2015). The standard retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortised cost and fair value. It eliminates the existing IAS 39 categories of held to maturity, available-for-sale and loans and receivables. For an investment in an equity instrument which is not held for trading, the standard permits an irrevocable election, on initial recognition, to present all fair value changes from the investment in other comprehensive income. The standard includes guidance on classification and measurement of financial liabilities designated as fair value through profit or loss and incorporates certain existing requirements of IAS 39 Financial Instruments: Recognition and Measurement on the recognition and de-recognition of financial assets and financial liabilities. The company is assessing the impact that the standard will have on the 2017 financial statements.
  - Amendment to IAS 32 Financial Instruments: Presentation (effective January 1, 2014) clarifies that an entity currently has a legal enforceable right to offset if that right is not contingent on a future event and enforceable both in the normal course of business and in the event of default, insolvency or bankruptcy of the entity and all the counterparts. In addition, it clarifies that gross settlement is equivalent to net settlement if, and only if, the gross settlement mechanism has features that eliminate or result in insignificant credit and liquidity risk and process receivables and payables in a single settlement process or cycle. The company is assessing the impact that the standard will have on the 2014 financial statement.
  - IFRIC 21 Levies (effective January 1, 2014) provides guidance on accounting for levies in accordance with the requirements of IAS 37 Provisions, Contingent Liabilities and Contingent Assets. The interpretation defines a levy as an outflow from an entity imposed by a government in accordance with legislation. It requires an entity to recognise a liability for a levy when and only when the triggering event specified in the legislation occurs. The company is assessing the impact that the standard will have on the 2014 financial statement.
  - Improvements to IFRS 2010-2012 and 2011-2013 cycles contain amendments to certain standards and interpretations and are effective for accounting periods beginning on or after July 1, 2014. The main amendments applicable to the company are as follows:
    - IFRS 13 Fair Value Measurement is amended to clarify that issuing of the standard
      and consequential amendments to IAS 39 and IFRS 9 did not intend to prevent entities
      from measuring short-term receivables and payables that have no stated interest rate at
      their invoiced amounts without discounting, if the effect of not discounting is
      immaterial.
    - IAS 24 Related Party Disclosures has been amended to extend the definition of 'related party' to include a management entity that provides key management personnel services to the reporting entity, either directly or through a group entity. For related party transactions that arise when key management personnel services are provided to a reporting entity, the reporting entity is required to separately disclose the amounts that it has recognized as an expense for those services that are provided by a management entity; however, it is not required to 'look through' the management entity and disclose compensation paid by the management entity to the individuals providing the key management personnel services.

The company is assessing the impact that the standard will have on its 2015 financial statements.

Notes to the Financial Statements (Continued) December 31, 2013

### 4. Critical accounting estimates and judgments in applying accounting policies

The company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The key sources of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on amounts recognised in the financial statements, or which have a risk of material adjustment in the next year, are as follows:

### (i) Fair value of financial instruments:

In the absence of quoted market prices, the fair value of a significant proportion of the company's financial instruments was determined using a generally accepted alternative to quoted market prices. Considerable judgement is required in interpreting market data to arrive at estimates of fair values. Consequently, the estimates arrived at may be significantly different from the actual price of the instrument in an arm's length transaction.

### (ii) Outstanding claims:

Outstanding claims comprise estimates of the amount of reported losses and loss expenses plus a provision for losses incurred but not reported based on historical experience. The loss reserves have been determined by the company's actuary using the company's past loss experience and industry data. Amounts recoverable in respect of claims from re-insurers are estimated in a manner consistent with the underlying liabilities.

Management believes, based on the analysis completed by the actuary that the provision for outstanding losses and loss expenses will be adequate to cover the ultimate net cost of losses incurred up to the reporting date. However, the provision is necessarily an estimate and may, ultimately, be settled for a significantly greater or lesser amount. Any subsequent differences arising are recorded in the period in which they are determined.

### 5. Responsibilities of the appointed actuary and external auditors

The Board of Directors, pursuant to the Insurance Act, appoints the Actuary whose responsibility is to carry out an annual valuation of the company's policyholders' liabilities in accordance with accepted actuarial practice and regulatory requirements and report thereon to the policyholders and shareholders. In performing the valuation using the policy premium method, the Actuary makes assumptions as to the future rates of interest, asset defaults, mortality, morbidity, claims experience, inflation, reinsurance recoveries, expenses and other contingencies, taking into consideration the circumstances of the company and the insurance policies in force.

The valuation is made in accordance with accepted actuarial practice, as well as any other matter specified in any directive made by regulatory authorities. The actuary, in his verification of the management information provided by the company, and used in valuation, also makes use of the work of the external auditors. The actuary's report outlines the scope of his work and opinion. An actuarial valuation is prepared annually.

The external auditors have been appointed by the shareholders pursuant to the Jamaican Companies Act to conduct an independent and objective audit of the financial statements of the company in accordance with International Standards on Auditing, and report thereon to the shareholders. In carrying out their audit, the auditors also make use of the work of the actuary and his report on the company's actuarially determined policy liabilities. The auditors' report outlines the scope of their audit and their opinion.

Notes to the Financial Statements (Continued) December 31, 2013

### 6. Cash and cash equivalents

	2013	2012
Bank balances	8,902,835	638,398
Bank of Jamaica Certificates of Deposit	68,817,000	36,016,000
Securities purchased under resale agreements	-	4,356,116
	\$77,719,835	\$41,010,514

At December 31, 2013, underlying securities obtained and held under resale agreements had a fair value of \$Nil (2012: \$4,718,176).

### 7. Accounts receivable

		2013	2012
	Premium receivables Interest receivable Other receivables	16,875,377 2,336,015 	4,641,174
		\$ <u>19,226,839</u>	4,641,174
8.	Investments	2013	2012
	Available-for-sale: Government of Jamaica (GOJ) Global bond	9,779,590	8,069,060
	Government of Jamaica (GOJ) Global bolid Government of Jamaica (GOJ) Benchmark	9,779,590	8,009,000
	Investment Notes	135,940,500	139,189,502
		\$ <u>145,720,090</u>	147,258,562
		2013	2012
	Maturity profile:		45.040.500
	3 months to 1 year 1 to 5 years	145,720,090	45,013,502 102,245,062
		\$145,720,090	147,258,562

Investments include \$90,945,000 (2012: \$94,176,000) held to the order of the Financial Services Commission (FSC) as required by the Insurance Act 2001.

### 9. Property, plant and equipment

	Leasehold improvements	Furniture, fixtures & fittings	<u>Total</u>
Cost:			
Additions, being total cost for the year	2,007,753	2,852,492	4,860,245
Depreciation:			
Charge for the year, being accumulated			
depreciation at end of year	(55,766)	(25,286)	(81,052)
Net book values	\$ <u>1,951,987</u>	2,827,206	4,779,193

Notes to the Financial Statements (Continued) December 31, 2013

### 10. Share capital

2013 2012

Authorised and stated capital issued and fully paid: 1,000 ordinary shares at no par value

\$1,000

1,000

### 11. Capital reserve

This reserve arose from the waiver of an amount payable by the company to the parent society in 2009.

### 12. Investment revaluation reserve

This represents the unrealised gains, net of losses, on the revaluation of available-for-sale investments.

### 13. Accounts payable

	<u>2013</u>	2012
Due to reinsurers	5,917,857	-
Other payables and accruals	4,938,424	623,693
	\$10,856,281	623,693

Other payables and accruals include \$736,032 (2012: \$Nil) due to other related parties.

### 14. Due to parent society

The amount due to parent society represents amounts due for staff costs and other operating expenses.

### 15. Policyholders' liabilities

An Incurred But Not Reported (IBNR) reserve is computed for the portfolio of business for which monthly premiums are paid at the end of the month while the risks are incurred during the month. The reserve is determined by reviewing the claims reported in 2013 that were incurred prior to 2013, expressing that as an amount per \$1,000 of the inforce insured loan amounts at December 31, 2012 using data available on the historical performance of the insured portfolio. This factor was then applied to the inforce insured loan amounts to determine the IBNR at December 31, 2013. Based on the method used to compute the actuarial reserves, there are no assumptions for mortality, valuation interest rates, lapses or expenses.

### (a) Policyholders' liabilities consist of:

	2013	2012
Incurred but not reported reserves	11,863,851	
Benefit claims payable	23,688,069	
	\$35,551,920	-

Notes to the Financial Statements (Continued) December 31, 2013

### 15. Policyholders' liabilities (cont'd)

(b) Change in policyhold	lers' liabilities:
--------------------------	--------------------

	2013	2012
Incurred but not reported reserves	11,863,851	
At the end of the year	11,863,851	_
Benefit claims payable:		
Policyholder claims and benefits	23,688,069	
At the end of the year	\$23,688,069	-

### 16. Deferred tax liability

Deferred tax liability is attributable to the following:

	2013	2012
Property, plant and equipment	147,358	-
Interest receivable	350,402	696,176
Unrealised foreign exchange gains	5,115	685
	\$502,875	696,861

Movement in temporary differences during the year:

	Balance at January 1, 2012	Recognised in profit/loss	December 31 2012	Recognised in profit /loss	December 31 2013
Property, plant and equipment			_	147,358	147,358
Interest receivable Unrealised foreign	1,530,000	(833,825)	696,176	(345,774)	350,402
exchange gains	497	188	685	4,430	5,115
	\$ <u>1,530,497</u>	(833,637)	696,861	(193,986)	502,875

### 17. <u>Disclosure of expenses</u>

Loss before finance income and taxation is stated after charging:

Bess before intance meeting and taxation is stated after charging:		
	2013	2012
	\$	\$
Auditors' remuneration - current year	1,550,000	529,000
- prior year	49,514	-
Depreciation	81,052	-
Directors' remuneration	1,050,000	420,000

Notes to the Financial Statements (Continued) December 31, 2013

### 18. Salaries, pension contributions and other staff benefits

	<u>2013</u>	2012
Salaries	1,737,017	-
Statutory contributions	217,898	_
Pension cost [note 3(m)]	56,711	-
Other staff benefits	410,229	
	\$2,421,855	-

### 19. Taxation

a) The taxation charge for the year is based on investment income after the deduction of expenses which are allowable in earning these types of income. The charge for taxation comprises:

	2013	<u>2012</u>
(i) Current tax expense: Income tax at 15% Prior year (over) / under provision	1,796,728 ( <u>88,185</u> )	2,418,967 1,093,543
	1,708,543	3,512,510
(ii) Deferred taxation: Origination and reversal of temporary differences	( 102 086)	( 922 (27)
* · · · ·	(_193,986)	(_833,637)
Total taxation recognised in profit or loss	\$ <u>1,514,557</u>	2,678,873
Pagangiliation of offactive towards		

### (b) Reconciliation of effective tax rate:

The actual charge differs from the "expected" tax charge for the year as follows:

Net investment income	2013 \$5,287,520	2012 6,695,633
Computed "expected" tax charge @ 15% Prior year (over)/under provision Difference between profit for financial statements and tax reporting purposes on –	793,128 ( 88,185)	1,004,345 1,093,543
Premium tax disallowed Depreciation and capital allowances (Allowable)/disallowable expenses	1,531,691 24,858 ( <u>746,935</u> )	580,985
Actual tax charge	\$ <u>1,514,557</u>	2,678,873

- (c) Effective July 28, 2011, the company became a registered insurance company under the Insurance Act, 2001 and in accordance with the Financial Services Commission. Accordingly, investment income is taxed at 15%. The effective tax rate for 2013 was 28.64% (2012:40%) of pre-tax profits of \$5,287,520 (2012: \$6,695,633).
- (d) Other comprehensive income:

There is no taxation attributable to other comprehensive income.

Notes to the Financial Statements (Continued) December 31, 2013

### 19. Taxation (cont'd)

### (e) Premium tax:

Premium tax is recognised as 3% of premium income less certain allowance expenses, where applicable, and is recognised as an operating expense.

### 20. Insurance and financial risk management

The company's activities expose it to insurance and financial risks. These activities involve the analysis, evaluation and management of some degree of risk or combination of risks. Taking these risks is core to the insurance business, and the operational risks are an inevitable consequence of being in business. The company's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the company's financial performance.

The company manages risk through a framework of risk principles, organisational structures and risk measurement and monitoring processes. The company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to date information systems.

The Board of Directors is ultimately responsible for the establishment and oversight of the company's risk management framework. The Board has established committees for managing and monitoring risks, as follows:

### **Investment Committee:**

The Investment committee recommends to the Board for its approval a written Investment and Loan Policy. The committee reviews investment activities at least six times each year, and ensures that the existing policies comprehensively deal with the management of the company's investment portfolio and that appropriate limits are being adhered to. The Investment committee has the responsibility of ensuring that risks are managed within the limits established by the Board of Directors and outlined in the Investment policy.

### Audit Committee:

The Audit Committee oversees how management monitors compliance with the company's risk management policies and reviews the adequacy of the risk management framework in relation to the risks faced by the company. Internal Audit assists the Audit Committee in its oversight role, by performing independent reviews of the risk management and control environment.

The most important types of risk are insurance risk, reinsurance risk, market risk, liquidity risk, credit risk, and other capital risk management. Market risk includes cash flow and fair value interest rate risk and currency risk.

### (a) Insurance risk:

The company issues insurance contracts that transfer insurance risk or financial risk or both. The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

Notes to the Financial Statements (Continued) December 31, 2013

### 20. <u>Insurance and financial risk management (cont'd)</u>:

### (a) Insurance risk (continued):

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur if the frequency or severity of claims and benefits is greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the estimate established using statistical techniques.

The company has developed its insurance underwriting strategy and reinsurance arrangements to determine the type of insurance risks accepted. The company's underwriting strategy includes the use of a medical questionnaire with benefits limited to reflect the health condition of applicants. For the contracts where death is the insured risk, the most significant factors that could increase the overall frequency and severity of claims are epidemics (such as AIDS) and wide-ranging lifestyle changes such as eating, smoking and exercise habits resulting in earlier or more claims than expected.

The benefits assured for the Creditor Life policy, distributed by retained amounts and by reinsured amounts are shown below:

	Benef			
Band (\$'000)	Total amount (\$'000)	Total amount reinsured (\$'000)	Total amount retained (\$'000)	
0 - 1,000	1,029,883	-	1,029,883	
1,000 - 2,000	2,697,940		2,697,940	
2,000 - 5,000	10,173,858	2,848,704	10,173,858	
5,000 - 10,000	10,622,117		7,773,413	
10,000 and over	5,287,102	3,402,704	<u>1,884,398</u>	
All Bands	29,810,900	6,251,408	23,559,492	

### (b) Reinsurance risk:

Reinsurance risk is the risk that a reinsurer will default and not honour obligations arising from claims. To limit its exposure of potential loss on an insurance policy, the company cedes certain levels of risk to a reinsurer. Reinsurance ceded does not discharge the company's liability as primary issuer. The company also limits the probable loss in the event of a single catastrophic occurrence by reinsuring this type of risk with reinsurers.

The company manages reinsurance risk by selecting a reinsurer which has established capability to meet its contractual obligations and which generally have favourable credit ratings as determined by a reputable rating agency. Retention limits represent the level of risk retained by the insurer. Coverage in excess of these limits is ceded to reinsurers up to the treaty limit. The retention programs used by the company are summarized below:

### Type of insurance contract

Group creditor life contract

### Retention limit

JMD5,000,000; USD 51,000; CAD 52,000; GBP 33,000 of coverage per life insured. Treaty limits apply

Notes to the Financial Statements (Continued) December 31, 2013

### 20. Insurance and financial risk management (continued)

### (c) Credit risk:

Credit risk is the risk that a party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Credit risk arises from investing activities and deposits with other institutions. Balances arising from these activities include cash and cash equivalents, securities purchased under resale agreements and investments.

Credit risk exposure is the amount of loss that the company would suffer if all counterparties to which the company was exposed were to default at once.

### Management of credit risk:

The Investments and Loan Policy of the company sets out the framework within which credit risk is managed. This policy is the responsibility of the Board of Directors, with the principal objective being to:

- i. Maximize the risk adjusted after tax return on the investment portfolio
- ii. Manage risk at a level that maintains the company's capital above regulatory requirements, and
- iii. Maintain sufficient liquidity to settle liabilities as they fall due.

### Cash and cash equivalents:

These are held with reputable financial institutions and collateral is not required for such accounts as management regards the institutions as strong.

### Investment securities:

These debt securities are mainly government issued debt for which risk of default is considered low by regulators. The company observes the concentration limits as prescribed by the Insurance Regulations. The company is in compliance with Regulations, 2001 and the company's investment and loan policy.

At the reporting date the maximum exposure is represented by the carrying amount of financial assets shown on the statement of financial position. There was no change in the company's exposure to credit risk, or the manner in which it manages and measures credit risk.

### (d) Liquidity risk:

Liquidity risk, also referred to as funding risk, is the risk that the company will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from an inability to sell a financial asset quickly at, or close to, its fair value. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, and the availability of funding through an adequate amount of committed facilities, which includes:

- Weekly cash flow projections and close monitoring of its cash resources;
- · Managing the concentration and profile of debt maturities;
- Maintaining a portfolio of highly marketable assets that can be easily liquidated as
  protection against any unforeseen interruptions to cash flows; and
- Monitoring balance sheet liquidity ratios against internal and regulatory requirements;

Notes to the Financial Statements (Continued) December 31, 2013

### 20. Insurance and financial risk management (continued)

### (d) Liquidity risk (continued):

Assets available to meet liabilities include cash balances. The company would also be able to meet unexpected net cash outflows by selling securities, should it become necessary.

The carrying amount of the contractual maturities of accounts payable and policyholders liabilities at year-end approximates the contractual cash flow expected, and are due within one year from the reporting date.

There has been no significant change in the company's exposure to liquidity risk or the manner in which it manages and measures the risk during the year.

### (e) Market risk:

Market risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market.

These arise mainly from changes in interest rate and, foreign exchange rate and will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

### (i) Foreign currency risk:

Foreign currency risk is the risk that the market value of, or cash flows from, financial instruments will fluctuate because of changes in foreign exchange rates.

The company incurs foreign currency risk on transactions that are denominated in currencies other than the Jamaica dollar. The currencies giving rise to this risk are the United States Dollar (USD), Great Britain pounds (GBP) and Canadian dollar (CAD). The company ensures that the net exposure is kept to an acceptable level by monitoring its daily positions against approved limits. At the reporting date, the net foreign currency assets were as follows:

	Balar	Balances		Exchange rates		
	2013	2012	2013	2012		
ADMINISTRAÇÃO.	S	\$	\$	\$		
USD	94,462	88,990	105.72	92.15		
GBP	287	-	173.56	_		
CAD	280		98.99			

A 15% (2012: 10%) weakening of the Jamaica dollar against the various currencies at December 31 would have increased operating surplus by the amounts shown. A 1% (2012: 1%) strengthening of the Jamaica dollar against these currencies at December 31, would have had the opposite effect as shown. The analysis assumes that all other variables, in particular, interest rates, remain constant.

Notes to the Financial Statements (Continued) December 31, 2013

### 20. Insurance and financial risk management (continued)

### (e) Market risk (continued):

### (i) Foreign currency risk (continued):

	20	)13	201	2
	1%	15%	1%	10%
	Strengthening	Weakening	Strengthening	weakening
	\$	\$	\$	\$
USD	(99,862)	1,497,931	(82,004)	820,042
GBP	( 497)	7,459	-	-
CAD	(	4,153		

### (ii) Interest rate risk:

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The company manages this risk by monitoring interest rates daily. Even though there are no formally predetermined gap limits, to the extent judged appropriate, the maturity profile of the financial assets is matched with that of the financial liabilities. Where gaps occur, management expects that its monitoring will, on a timely basis, identify the need to take quick action to close the gap, if it becomes necessary.

The following table summarises the carrying amounts of recognised assets, liabilities and equity to arrive at the company's interest rate gap based on the earlier of contractual repricing or maturity dates. There were no off-balance sheet financial instruments giving rise to interest rate risk. This interest rate gap is normal within insurance company.

	2013					
	Immediately rate sensitive	Within 3 months	Three to	Over 1	Non-rate sensitive	Total
	\$	\$	\$	\$	\$	\$

On-statement of financial position gap, being total						
interest rate sensitivity gap	641,427	40,435,542	49,588,219	102,245,062	(192,910,250)	
Cumulative gap	641,427	41,076,969	90,665,188	192,910,250		

The company is exposed to interest rate risk. Investments totalling \$145,720,090 (2012: \$147,258,562) have a fixed or variable rate of interest. There are no interest-bearing financial liabilities.

### Sensitivity analysis:

Fair value sensitivity for fixed rate instruments:

An increase/decrease using the below scenarios would adjust profit or loss by the amounts shown below:

	20	13	20	12	
	Increase in interest rate	Decrease in interest rate	Increase in interest rate	Decrease in interest rate	
J\$ denominated instruments US\$ denominated	250 basis points	100 basis points	100 basis points	100 basis points	
instruments	200 basis points	50 basis points	50 basis points	50 basis points	
		2013	2012		
Jamaican dollars	Increase \$ (6,372,915)	Decrease \$ 2,713,419	Increase \$ (1,036,220)	Decrease \$ 1,051,824	
	2013		2012		
	Increase \$	Decrease \$	Increase \$	Decrease \$	
United States dollars	(_253,681)	64,880	(_91,303)	92,559	

Notes to the Financial Statements (Continued) December 31, 2013

### 20. <u>Insurance and financial risk management (continued)</u>

### (e) Market risk (continued):

### (ii) Interest rate risk (continued):

Cash flow sensitivity analysis for variable rate instruments:

An increase/decrease using the above scenarios would adjust reserves and profit or loss by the amount shown below. The analysis assumes that all other variables, in particular foreign currency rates, remain constant.

	2013		20	12
	Effect on Surplus		Effect	on Surplus
	Increase	Decrease	Increase	Decrease
	\$	\$	\$	\$
Variable rate instruments December 31	1,125,000	450,000	1,800,000	450,000

There has been no change in the company's exposure to market risk or the manner in which it manages and measures the risk during the year.

### (f) Capital risk management:

Capital risk is the risk that the company fails to comply with mandated regulatory requirements, resulting in a breach of its minimum capital ratios and the possible suspension or loss of its insurance licence.

The company's objectives when managing capital are:

- (i) To comply with capital requirements set by the regulators of the insurance industry within which the company operates;
- (ii) To safeguard the company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits to other stakeholders; and
- (iii) To maintain a strong capital base to support the development of its business.

The company's main regulator is the Financial Services Commission (FSC) which monitors the capital requirements for the company. Regulators are primarily interested in protecting the rights of the policyholders and monitor the company closely to ensure that it is satisfactorily managing affairs for the benefit of the policyholders. At the same time, the regulators are also interested in ensuring that the company maintains an appropriate solvency position to meet unforeseen liabilities arising from economic shocks or natural disasters.

In implementing current capital requirements, the FSC requires the company to maintain a minimum capital requirement of \$150,000,000.

To assist in evaluating the current business and strategic opportunities, a risk-based approach is one of the core measures of financial performance. The risk based assessment measure which has been adopted is the Minimum Continuing Capital and Surplus Requirement (MCCSR) standard as defined by the FSC and dictated by the Insurance Regulations 2001. Under Jamaican regulations, the minimum standard recommended for companies is a MCCSR of 150%.

Notes to the Financial Statements (Continued) December 31, 2013

### 20. Insurance and financial risk management (continued)

### (f) Capital risk management (continued):

The MCCSR for the company is set out below:

	2013	2012
Regulatory capital held (\$`000)	202,571	196,279
Minimum regulatory capital (\$`000)	42,337	38,465
MCCSR Ratio	478.5%	510.3%

There has been no change to the company's approach to managing or measuring capital.

### 21. Fair value of financial instruments

Fair value amounts represent estimates of the arm's-length consideration that would currently be agreed between knowledgeable, willing parties who are under no compulsion to act and are best evidenced by quoted market prices, if they exist. Where quoted market prices are not available, the fair values of these instruments have been determined using a generally accepted alternative method.

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. These two types of inputs have created the following fair value hierarchy:

- Level 1 Quoted prices in active markets for identical assets or liabilities. This level includes listed equity securities and debt instruments on exchanges.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 Inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components. This hierarchy requires the use of observable market data when available.

Notes to the Financial Statements (Continued) December 31, 2013

# 21. Fair value of financial instruments (continued)

(a) Accounting classification and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, their classification and their levels in the fair value hierarchy. It does not include fair value information for financial assets and liabilities not measured at fair value if the carrying amounts is a reasonable approximation of fair values.

		Carryin	Carrying Amount			Fair	Fair value

### 23. Lease commitment

The company leases office space from a fellow subsidiary under the terms of a lease agreement dated November 13, 2013. The lease is for a term of three (3) years and is payable monthly.

The company is thereby committed to making future lease payments as follows:

	2013 \$	\$
Within one year	1,520,578	2
More than one year	2,891,591	
	4,412,169	

### 24. Loss arising from National Debt Exchange

The company voluntarily participated in the Government of Jamaica (GOJ) National Debt Exchange in February 2013. The acceptance of the offer resulted in the company exchanging local debt instruments of \$135,000,000. The exchange resulted in a one-off loss of \$4,835,671.
